

SEA CONTAINER INSPECTION PACK

Independent Verification Services | www.ivsltd.co.nz

Now available **exclusively** through IVS; the **SCIP** makes achieving **biosecurity** a breeze at your facility

Sea Container Inspection Pack (SCIP) ::

Conduct container checks in a truly professional manner with this brilliant pack, instilling confidence in your biosecurity operations with your customers and regulators. Priced at \$110.00 for Biosecurity Support Programme members and \$132.50 to non-members, the SCIP includes the following quality items:

1. Accredited Person Safety Vest x 1

Clearly identify the person carrying out container inspections and warn other staff and visitors that biosecurity activities are underway. Hi-vis orange with zip closure, internal pocket and external cellphone & pen pockets. Available in sizes M, L and XL – please state size required when ordering.

Add extra vests to your pack for only \$25.00 each!

2. Safety Cone Warning Sleeves x 2

You asked for them – IVS developed them! Now there will be no excuse for unauthorised entry into your uncleared goods/container unloading area when cones have been fitted with these durable warning sleeves. Designed for standard road cones but fit slim-liners as well. These cone sleeves are a NZ first and exclusive to IVS. *Cones not included.*

Add extra sleeves to your pack for only \$40.00 a pair!

3. Equipment Decals x 10

No more handwriting with the black marker. Pack of 10 self-adhesive vinyl labels includes 1 A4 size Biosecurity Waste Bin label (special material which will adhere to wheelie-bin type plastic) and 9 multi-purpose equipment labels.

4. Biosecurity Waste Bags x 6

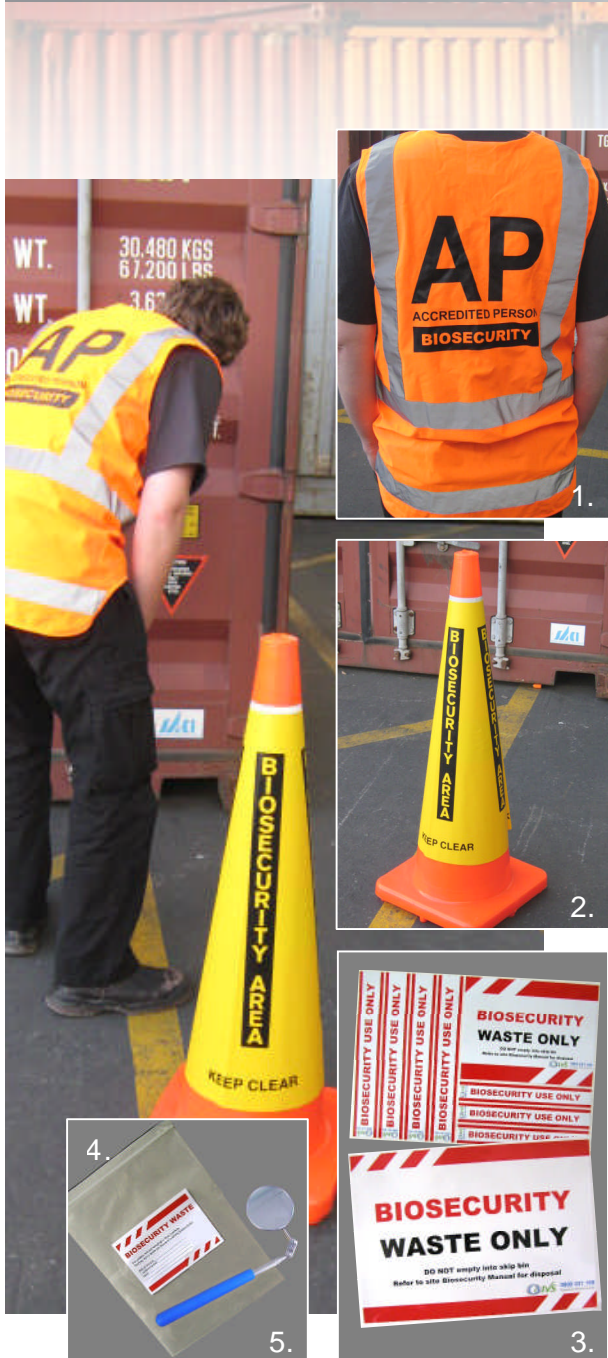

The best way to contain sweepings and dead biosecurity waste (insects, soil, leaves etc.) before placing in your biosecurity bin. Bags are 70 microns thick, transparent for easy inspection of contents without having to open, and easily sealed via the press-lock closure. Waste details can be recorded directly onto the bag with any normal pen for easy tracking until destruction.

5. Telescopic Inspection Mirror x 1

Telescopes from 200mm to almost 1m in length, with a multi-angle 55mm diameter mirror and comfortable rubber grip handle. The best little tool for inspecting twist locks, forklift pockets, motors and all other hard to reach areas.

To Order ::

Simply complete the form overleaf and email or fax to us. Prices include freight but exclude GST (see order form) and are subject to change without notice.
